PROFILE

Front-End Web Developer with 4+ years of experience in the full software lifecycle, from requirement gathering to UI/UX design, release, and maintenance. Proficient in Java, HTML, CSS, JavaScript/TypeScript, and frameworks like React.js/Next.js with TypeScript. Experienced in Node.js, Redux Toolkit, and integrating CMS platforms like Adobe Experience Manager. Skilled with Docker, CI/CD (GitLab), data visualization (D3.js), and map APIs (Google Maps). I'm currently using Dart/Flutter with Firebase, and at the same time, I'm starting the development of a new app with React Native, Next.js and Tailwind.

WORK EXPERIENCE

Joivy   2023 - PRESENT
Frontend Web/Mobile Developer

- I am responsible for the maintenance of the mobile app currently available in stores, developed using Flutter technology. At the same time, I have started working on the development of a new mobile app utilizing React Native, Next.js, and Tailwind CSS.

NTT Data   2019 - 2023
Software Developer - Frontend Developer

Open Fiber S.p.A.

- Developed a custom monitoring app for the Italian's optical fiber network. Contributed to the analysis and selection of appropriate technologies, and collaborated with the design team to analyze the UI, ensuring project goals were met on schedule. Integrated APIs using RTK Query and Google Maps API, while monitoring performance throughout development and optimizing processes as needed.

Dolomiti Energia

- Developed a private area for managing supplies and bills using React, TypeScript, and RTK Query, featuring auto-generated APIs from Swagger with efficient cache management. Created custom components tailored to different user profiles, including Retail, Business, Parent Company, Consultants, and Condominium Administrators.

Genertel (Generali group)

- Developed a new section of the Genertel.it website, creating new components for the CMS. Implemented a script to extract data from the motor estimator process and send it to Analytics. Updated various AMP landing pages and modified the integrated live chat on select landings, adapting it to meet new customer requirements.

Sogei

- Developed a distance learning web app using React and Redux. Created custom components for various user profiles, including Parents, Teachers, Students, Managers, and other school roles. The web app features an electronic educational register, enabling students to access streaming lesson links, view homework, and more.
